Master of Design - M.Des - a two year programme was started from the academic year starting July1979. An award of UNDP funds to IDC was a feather in the cap. This assistance broadened IDC's activities. Under this programme IDC received sophisticated equipment for its various studios to update the existing facilities. Most of the faculty members were sent abroad for exposure to Western design photosophies & techniques under UNESCO fellowship programme. Eminent designers from various parts of the world visited the centre. They interacted with the students and faculty, conducted a number of short term courses & seminars. Managers & engineers from the Industry were also invited to participate in these programmes.
